

SONICA® 3200L

6
LITRES

General characteristics

Ultrasonic Cleaning is a safe and efficient modern procedure, which ensures perfect cleaning within the shortest time possible. It has many advantages over ordinary cleaning methods. Ultrasonics can remove even the most tenacious deposits from parts which would be difficult to reach by hand, it also reduces the risk of injury or infection which may occur during manual cleaning

Tank Dimensions

Length	500 mm
Breadth	140 mm
Depth	100 mm
Capacity	6 litres

External Dimensions

Length	540 mm
Breadth	165 mm
Height	210 mm
Weight	about 4,1 kg

Constructive Materials

External	Steel AISI 304
Internal	Steel AISI 304

CE EMC 89/336/CEE (EN 55011B)
 LV 73/23/CEE (EN 61010-1)
 MD 93/42/CEE Medical Devices

6 LITRES SONICA® 3200L

Technical Data

Main line voltage	230/240 V~50/60Hz
Main input power/consumption	180 W
Main input power w/heating	355 W
Peak HF ultrasound power	360 W
US fequency	45 khz ± 5%
Liquid drain	di serie (tubo 10x8 mm)
Transducers	4

Environmental conditions: Temperature

Rel. Hum. 80% up to 31°C. with linear decrease up to 50% at 40°C

Installation category: Class II according to EN 61010

Notes for use as "Medical Devices":

Denomination: Ultrasonic Cleaning Device

UMDNS-nomenclature (ECRI) 14-263

Field of application: cleaning and disinfection of surgical and dental instruments

Classification ((Medical Devices Directive 93/42/EEC, appendix IX):

Class I, Non Active MD, Non Invasive MD, Non Implantable MD

AVAILABLE SERIES

Version M The simplest version in the SONICA® range is equipped with a timer which can be set for to 15 minutes. It can also be set to manual operation..

Version MH This is equipped with a timer wich can be set for un to 15 minutes and can also be set to manual operation. The Thermostat for the heater is set at 60°C.

Version ETH Cleaning times and temperatures controlled electronically by a microprocessor. Waterproof control panel.

Version EP The most technologically advanced of the SONICA® range: new Sweep system generator; modern digital display control panel windows; degas time setting; cleaning times from 0 to 99 minutes; tank liquid temperature setting up to 70°C; memory for 9 cleaning programmes; **jet program** function to start quickly and easily cleaning cycle.

Technical specification subject to change.
